## Safety Advice

### Attention

In some countries approval is needed to set up a tent larger than 75 m<sup>2</sup>.

The owner of the tent has the sole responsibility to make sure that these local rules are followed and that the mounting is correct.

In case of bad weather conditions, it is your responsibility to ensure that people inside are safe and that the tent does not cause damage to others.

Do not use open fire, welding equipment or other ignition sources in the tent. Though the fabric is made of flame retardant material it can still burn.

It is always recommended that you secure your tent properly with safety straps and augers when you put up the structure.

We recommend you to insure the tent, or check if it is covered by home contents insurance, in case of unplanned events, accidents or bad weather.

Tents are meant as temporary shelter and must be evacuated under extreme weather conditions.

This structure is not tested for specific snow and wind loads. That's why we always recommend to remove snow from the top.

# Assembly

**Step 1:** Lay out all roof tubes and connectors as shown.

**Step 2:** Join the roof tubes and connectors from middle and out.  
*See Roof Assembly.*

**Step 3:** Apply legs in one side as shown.

**Step 4:** Put the roof cover on and tie down with bungeeballs as shown.

\* Note: Tie some of the bungees in one side and then some in the other. Continue this until all bungees are in place

**Step 5:** Raise the legs in the opposite site.

**Step 6:** Make sure the cover is fastened.

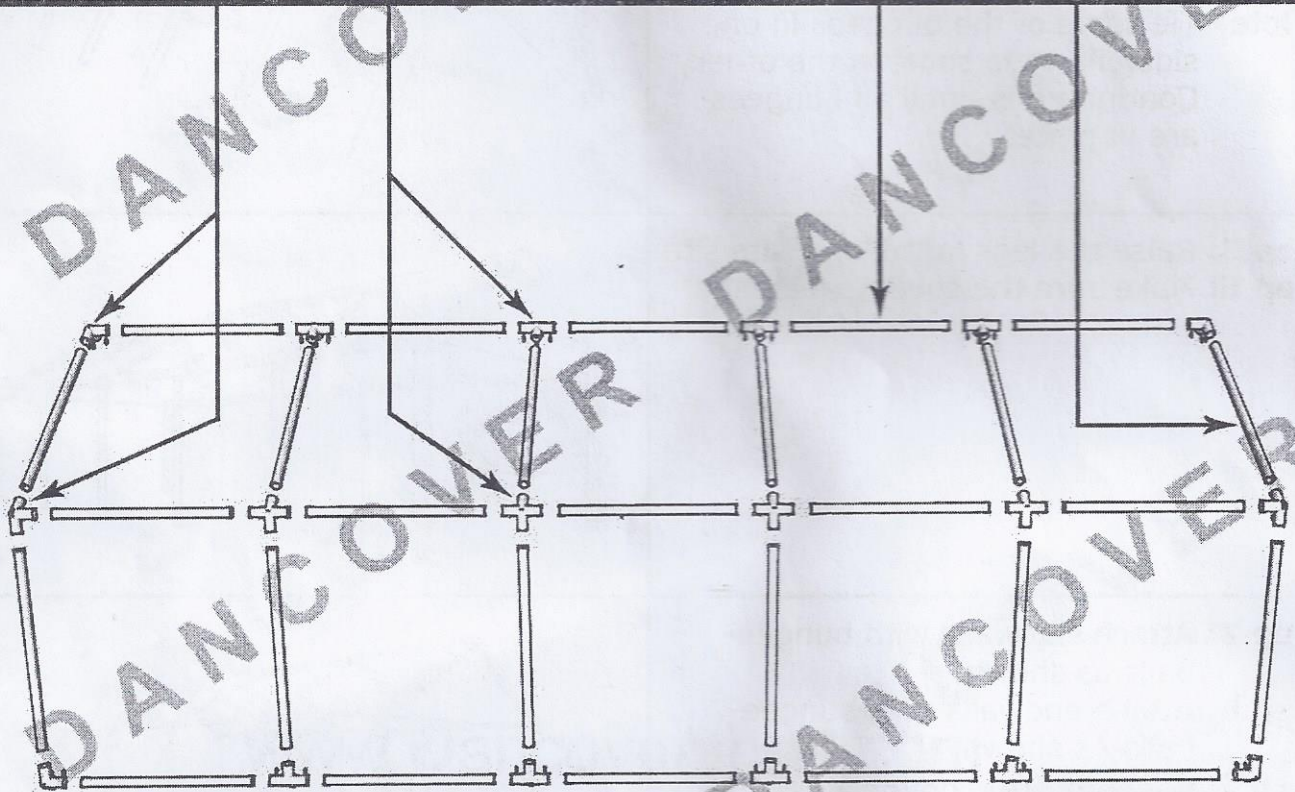

**Step 7:** Attach sidewalls with bungeeballs as shown.

**Step 8:** Attach endwalls with bungeeballs as shown.

**Step 9:** Connect leg cover with sidewall and endwall by velcro as shown

# Roof Assembly

**Step 1:** Lay out all roof tubes and connectors as shown above.

**Step 2:** Join the roof tubes and connectors from middle and out.
